

I appreciate the FCC taking an interest in making sure I am no longer bothered by tele-marketers. However, I live in Indiana and am very satisfied with our current state law. We used to receive 4 or 5 calls every night, but now we receive less than 2 per week. I am afraid that any change you are considering may make us vulnerable to the predatory tactics of the tele-marketers again. Please put your efforts into helping the individual states enact laws instead of potentially weakening the laws in Indiana. Thank you very much.
